Any Time, Any Where, Any Device

AeroxSignLoc

WINNING.I's AEROX provides AI-powered touchless fingerprint capture for secure mobile identity verification

USE CASES

Additional Authentication for Financial

Real Name Verification for eKYC

Police Criminal Investigation and Lost Child Prevention
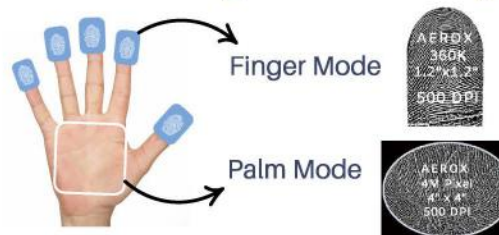

**Substituting ID at Hospitals**

Identification of Sharing Services

Secure Retrieval of Operating Room Images

SCANNER : Legacy Compatible

Standard Image Data Exchanges

Finger Mode

AEROX 360K 1.2"x1.2" 500 DPI

Palm Mode

AEROX 4M Pixel 4" x 4" 500 DPI

C2CL(Contact to Contactless)

PATENT No. US 10,822,612

Contactless Fingerprint

Finger-shape Perspective Correction

AEROX

Contact-based Fingerprint
Legacy System(AFIS)

Overlap area **99.9%**

Contact To Contactless... SDK

VERIFICATION : 4-TYPES

Local Mode
Biometric information is installed independently on a personal device

Interoperable Mode
Ensures permanent compatibility across heterogeneous devices

Cloud Mode
Provides biometric authentication for cloud computing environments

ServerOn Mode
The biometric authentication system must exist in a private network within the client company etc.

PRODUCTION INTENT

1 **Any Time, Any Where, Any Device**

2 **No Touch, No H/W, No Cable**

3 **Standardization is key to biometrics**

4 **Security**

5 **Permanent Interoperability**

6 **Easy, Secure, Economical**

7 **User Selectable, Self-Sovereignty**

8 **All in one**

KEY FEATURES

HIGHEST QUALITY GUARANTEED

1 **1-Finger, Multi-Finger, Palm Biometric Verification**

2 **User Friendly UI/UX + AI Assistance**

3 **Anti-spoofing, Present Attack Defense, Live Finger Detection**

4 **Financial Transaction Suitability**

5 **Interoperability**
